Credit Name:
Assignment Name: CS20 Chapter 4 Mastery Reflection Log

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge? I approched the challenge by understanding it then solving it

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion? I actually did find alot of it confusing but after learing and understanding a bit i was able to clear my confusion a bit.

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding? Not really i started with the IPO Chart then started with the code

How did you decide on the tools, data structures, or algorithms to use? I used the Coding srandards in my codes

Implementation

Did you write the code in small pieces or attempt the entire solution at once? I first wrote the code on google docs then put it into eclipse

How did you test your solution along the way to make sure it was working? After finishing my code I ran it through ai and told it to see for any flaws and mistakes and it told me if there was any

Overcoming Challenges

What part of the problem was the most difficult for you? The most difficult part for me was to learn how to code due to the fact im still learning

How did you handle moments when you felt stuck or unsure of what to do next? I watched a few videos or/and asked ai to help me understand

Learning

Was there anything you learned that you think will help you with future challenges? As of right now im not sure if this will help me in the future.
